

## FAST DEGREASER - LK - 550

GREASE REMOVER ( DEEP CLEANING )

**DESCRIPTION:** **FAST DEGREASER LK - 550**, is an industrial degreaser of high concentration formulated to provide to user a rapid penetration and removal of most persistent dirt and grease residues. The common industrial degreasers (sodium-hydroxide based) tend to separate when used at high temperatures, significantly reducing its degreasing power. To avoid this, **FAST DEGREASER LK - 550**, contains in its formulation an accurate combination of anionic and nonionic detergents, so that an efficient performance is achieved at temperatures up to 85 ° C. This can be achieved in superior cleaning applications for wash in hot dip tanks or pressure washing with high temperatures. The high concentration of solvent, detergents and alkaline agents presents in It, provide an aggressive action against fats, oils and dirt that often accumulates in the areas of maintenance and industrial production. **FAST DEGREASER LK - 550**, contains corrosion inhibitors that protect all kind of metals and prevent the formation of rust. It has a high concentration of active ingredients that make it a very competitive product in the industry for its price / dilution use. Although it contain a solvent degreasers, it is safe for the user to use dilutions. Also, it is not flammable. It contains no chlorinated, or abrasive toxics.

## FORTE DEGREASER - SC - 400

GREASE REMOVER ( Scented )

**DESCRIPTION:** **FORTE DEGREASER - SC - 400**, is a versatile product that allows for numerous maintenance and cleaning tasks in restaurants and food factories. It acts immediately on fat of vegetable and animal origin, reducing the time required to carry out any cleaning and grease removal task. Also, avoid the additional purchase of more degreasing products. This product is completely biodegradable, and is 100% water miscible. It contains corrosion inhibitors and does not leave residue, additionally it does not leave stains and is very safe to use on all types of metal surfaces, such as stainless steel, granite, concrete or ceramic tiles. Contains fragrance to eliminate bad odors. It is easy to rinse, produces low foam, and avoids excessive water consumption. The humectants present in this product provide rapid penetration, dissolving dirt and animal or vegetable fat, reducing maintenance time. **FORTE DEGREASER - SC - 400**, can be diluted in hot water, increasing its performance, and is widely used in

## METAL CLEANER - SW - 95

METAL DEGREASER

**DESCRIPTION:** **METAL CLEANER - SW - 95**, is a concentrated, high-performance product, with intensive power for industrial cleaning. It is effective for eliminating different types of waste such as mineral-based grease and industrial oils in sawmills, as well as animal fat in slaughterhouses and meat product packaging places. It is also ideal for high temperature pressure washing, degreasing concrete, tile and granite floors, without leaving stains or residue. One of its main characteristics is that when subjected to high temperatures, it does not present physical-chemical changes or separation of its components. This product contains a combination of solvents and concentrated detergents, which allow for quick and complete removal of dirt on grills, countertops and stainless steel appliances. **METAL CLEANER - SW - 95**, contains corrosion inhibitors and can be applied to a wide variety of metal surfaces, such as stainless steel, metal floors in meat, chicken and pork transport trucks. It can also be used to clean garbage trucks. It is easy to rinse, avoiding excessive water consumption. Being 100% miscible in water, we can guarantee its complete biodegradability.
