

NEUTRASALT - S - 560 (Scrubber) Professional

DESCRIPTION: **NEUTRAL SALT - S560 (Scrubber)**, has been specially formulated for Scrubber Machines with low foaming and bubble formation. It is a 100% biodegradable and 100% water-miscible product, specially developed for cleaning floors in the winter months to remove dirt and salt stains. Its active ingredients penetrate and completely dissolve salt stains, especially when high amounts of salt are used to melt snow. Do not damage waxed floors. **NEUTRAL SALT - S560 (Scrubber)**, has 2 main functions: cleans and removes dirt and at the same time eliminates salt stains used in the winter, leaving the floors completely clean. It is safe to use on vinyl floors, concrete, polished granite, ceramic, marble, etc. It can be diluted between 80 and 100 cc of cold or hot water by adding them to the 5 or 6 gallon tank of the scrubber, which guarantees high performance and savings in money and time in cleaning processes.

DEGREASER - DP - 540 Concentrated Degreaser

DESCRIPTION: **DEGREASER - DP - 540**, is a concentrated water-based degreaser, designed to remove and clean grease and dirt from floors, bathrooms, walls, kitchens, and common areas, etc. It is ideal for use in restaurant kitchens and fast food places. Its high concentration characterizes it as a high-performance product. It has low foam and is 100% miscible in water. In addition, it is 100% biodegradable. **DEGREASER - DP - 540**, contains corrosion inhibitors, does not attack waxed floors or metal surfaces such as stainless steel countertops, granite, marble, ceramic or concrete floors. **DEGREASER - DP - 540**, is considered a multipurpose product in institutional cleaning due to its wide number of applications. It is very easy to rinse, which saves water and time in all cleaning processes. It is advisable to dilute the necessary amount according to the grease or dirt to be removed and apply with a mop. If necessary, use a suitable brush.

Mr. CATCH Effective Dust Control

DESCRIPTION: **Mr. CATCH** is a mixture of water-based polymers designed for sweeping and maintaining waxed floors, which provides greater durability and shine to the wax layer, being fully compatible with waxes of polymeric origin. **Mr. CATCH** cleans and traps dust particles, lint and hair, leaving floors extremely shiny. **Mr. CATCH**, does not contain solvents or compounds derived from hydrocarbons or other types of lubricants. It does not leave slippery films like other products that cause accidents. Its origin is polymeric and when rubbed against waxed floors, it attracts particles of dust, lint or hair, retaining them amazingly. It is 100% biodegradable. **Mr. CATCH** has become a novelty in the institutional cleaning market by reducing floor maintenance
